

You will download Exemplify and 3 exams, 2 mock exams and the course exam. Download all 3 to your computer as soon as you can today. You will now have the password for the 2 mock exams and take them as soon as you can. You will receive the password for the course exam minutes before it is scheduled, usually at the end of the course.

Mock exam #1 will establish the photo ID used for your remote exam. It has 16 questions designed to guide you through how Exemplify works.

Mock exam #2, the second mock exam will confirm the photo taken in the first one and will record you when you answer the one question by typing the answer “Yes”

These two mock exams confirm that your computer is compliant and will allow you to take the course exam.
